As pilots rise through the ranks and fly aircraft of ever-increasing sophistication, one question remains constant: What is next? And one answer will always resonate: More. More speed. More capability. More power. More capacity. More of the entirety that makes the Sling TSi an aircraft with an uncompromising mission: To offer unrivalled performance, safety and reliability in the hands of all pilots no matter the mission. The Sling TSi is not simply more aircraft it is more of all the reasons you fly.

Following on from the legacy of the Sling 2 and Sling 4, the Sling TSi has the same great handling characteristics that made its predecessors legendary. The Sling TSi has been critically acclaimed for its all-round capabilities, superb handling and functionality. The Sling TSi offers the same perfectly co-ordinated flight characteristics, with controls that are highly responsive yet not overly sensitive. It comfortably seats four with baggage and cruises effortlessly at 9,000 to 19,000 ft, making it the ultimate long distance cross-country machine.
**Sleek Design**

A truly first-class travel experience, the Sling TSi’s sublime and beautifully appointed interior features executive four seat comfort. Enveloped in authentic leather and lavish carpeting, the Sling TSi stands out with an elegance that adds a touch of class to aircraft interiors. Available in six colour palettes: Cast Iron, Red Velvet, Indigo Sky, Namib Dune, Cloud Burst and Crimson Ash with stitching, piping and panelling in complementary colours.

In addition to the leather interior, cabin heating and ventilation is included for all occupants, not to mention the carbon fibre instrumentation panel and centre console which adds the elegant feel. Effortlessly comfortable, superbly appointed and finished with a forensic eye.

**Unrivalled Avionics**

Designed by pilots for pilots, the Sling TSi contains a selection of Garmin technologies designed to deliver a refined, connected flight. The advanced configuration of the Garmin 10" G3X touch EFIS and backup Garmin G5 electronic flight display delivers exceptional performance, reliability and peace of mind. In addition, the Sling TSi’s Garmin standard avionics include radio, autopilot system with control panel, transponder, multifunction system interface and Bluetooth audio panel. Garmin’s highly respected user-friendly interface places an abundance of information at your fingertips whilst providing unparalleled capabilities.

**Powerplant & Performance**

Based on the proven concept of the Rotax 912 ULS and 914 UL engine series, the Rotax 915 IS engine offers increased power, the best power-to-weight ratio in its class, full take-off power up to 16,000 feet (4,877m) and a service ceiling of 18,000 feet (5,486m).

The sturdy, all metal construction of the Sling TSi makes it an aircraft able to go the distance, reliably. The incorporation, by design, of a ballistic parachute (optional) makes the Sling TSi an exceptionally safe aircraft to fly. The use of high-quality components throughout gives you the peace of mind that you deserve when making this kind of investment.

With an operating cost of around $60/hr and burning just 7-8 gph of MOGAS, the Sling TSi is the fast, efficient, economical cruiser of the modern age.
Specifications

Powerplant
- Rotax
- Turbo Charged 915 IS
- 141hp

Weights
- Std Empty: 490kg 1,081lbs
- Max Takeoff: 950kg 2,094lbs
- Useful Load: 460kg 1,014lbs

Propeller
- Airmaster
- 3/72" Blades/Diameter
- Constant Speed

Dimensions
- Wing Span: 9.5m 31.3ft
- Length: 7.17m 23.5ft
- Height: 2.45m 8ft
- Cabin Width: 1.15m 45.3in

Standard Equipment - Garmin
- G3X touch EFIS
- GS backup EFIS
- Auto pilot system including GMC 107 control panel
- GTX 260 COM radio
- GTX 35R transponder
- GMA 245R Bluetooth audio panel
- GAD 27 multifunction system interface

Optional Equipment
- Dual Garmin G3X touch EFIS
- Garmin GTN650 GPS/NAV/COMM/MFD
- Garmin NAV/COMM radio
- Magnum 90L ballistic parachute recovery system
- Dual operation electric trim
- Custom paint scheme designs
- Dual toe brakes
